Proposed Amendmen U.S. Serial No. 10/687,655 Your Reference: US6673 Our Reference: 0756-7206 September 26, 2007 Page 1 of 4

Please amend claims 4-6 as follows.

- 1. (Canceled)
- 2. (Previously Presented) A display device comprising:
- a substrate:
- a pixel portion comprising a plurality of pixels formed over the substrate;
- a driving circuit formed over the substrate, which controls the pixel portion;
- a charge pump circuit which supplies a voltage to the driving circuit, the charge pump circuit comprising:
 - a switching element formed over the substrate; and
 - a capacitor; and
- a charge pump control circuit formed over the substrate, which controls the charge pump circuit, the charge pump control circuit comprising:
- a variable frequency-dividing circuit formed over the substrate comprising:
 - a plurality of dividing circuits formed over the substrate;
- a plurality of switches electrically connected to the plurality of dividing circuits; and
- a decoder for controlling the plurality of switches; and a processing circuit formed over the substrate, which controls the variable frequency-dividing circuit.
- 3. (Original) A display device according to claim 2, wherein the charge pump control circuit can vary a clock frequency to input to the switching element.
- 4. (Currently Amended) A display device according to claim 3 claim 2, wherein the clock frequency is controlled by a CPU-the processing circuit.

Page 2 of 4

- 5. (Currently Amended) A display device according to claim 4 claim 2, wherein the CPU the processing circuit is comprised of comprises a thin film transistor.
 - 6. (Currently Amended) A display device comprising:
 a pixel portion comprising a plurality of pixels formed over a substrate;
 a charge pump circuit;
- a charge pump control circuit formed over the substrate, which controls the charge pump circuit, the charge pump control circuit comprising:

a variable frequency-dividing circuit comprising including a first thin film transistor formed over the substrate, the variable frequency-dividing circuit

a plurality of dividing circuits formed over the substrate;

a plurality of switches electrically connected to the plurality of dividing circuits; and

a decoder for controlling the plurality of switches; and a CPU comprising a second thin film transistor formed over the substrate, wherein the variable frequency-dividing circuit is controlled by the CPU,

wherein a dividing ratio is varied according to a display mode.

7.-9. (Canceled)

comprising:

and

10. (Original) A display device according to claim 2, wherein the display device is a liquid crystal display device.

Proposed Amendment U.S. Serial No. 10/687,655 Your Reference: US6673 Our Reference: 0756-7206 September 26, 2007 Page 3 of 4

11. (Original) A display device according to claim 6, wherein the display device is a liquid crystal display device.

12.-13. (Canceled)

- 14. (Original) A display device according to claim 2, wherein the display device is an EL display device.
- 15. (Original) A display device according to claim 6, wherein the display device is an EL display device.

16.-17. (Canceled)

- 18. (Original) A display device according to claim 2, wherein the display device is applied to an electrical equipment selected from the group consisting of a digital camera, a notebook type personal computer, a PDA; a DVD playback device, a folding portable information device, a watch type display device and a mobile phone.
- 19. (Original) A display device according to claim 6, wherein the display device is applied to an electrical equipment selected from the group consisting of a digital camera, a notebook type personal computer, a PDA, a DVD playback device, a folding portable information device, a watch type display device and a mobile phone.

20. (Canceled)

Proposed Amendmeh U.S. Serial No. 10/687,655 Your Reference: US6673 Our Reference: 0756-7206 September 26, 2007 Page 4 of 4

- 21. (Previously Presented) A display device according to claim 2, wherein the switching element is a transistor.
- 22. (Previously Presented) A display device according to claim 21, wherein the transistor is a thin film transistor.
- 23. (Previously Presented) A display device according to claim 2, wherein the switching element is a diode.
- 24. (Previously Presented) A display device according to claim 23, wherein the diode is a PIN diode.

25. (Canceled)

26. (Previously Presented) A display device according to claim 6, wherein the variable frequency-dividing circuit further comprises a plurality of dividing circuits, a plurality of switches electrically connected to the plurality of dividing circuits, and a decoder for controlling the plurality of switches.
